Was able to put up 22 sacks and a 50-0 score in a 5 minute quarter game against a 'Hall of fame' difficulty CPU. CPU Cs just wander into no man's land after the snap. If you player control a blitzing MLB you can just run around him and sacks come thick and fast to shut down their offense. When with the ball, scoring is not much harder, running it becomes a simple case of getting it into the secondary. DL and LBs are quick but DBs stand there gaumless for a few seconds as you get the 1st down and more a lot of the time. Shame really, I like the game otherwise and was looking for a decent alternate Madden. Hopefully this series can be one in the future.. A+ for effort. Sports video games are the only thing I truly miss about console gaming. While I can spend a fair amount of time with FIFA and NBA 2k, they aren't what I want to be honest. I want the NHL, I want the NFL, MLB, and NCAA football and basketball. Axis 2017 brings us one step closer to having a great PC american football game. Do not buy Axis Football if you want a perfect, Madden EA quality game. The playbooks are basic and quite limited, the passing game is a bit wonky, franchise mode is nothing compared to an EA or 2k game, I really could go on for a while here. That being said, I definitely recommend Axis Football 2017, and am quite happy with my purchase. (on sale for 17.99\$.) While far from perfect, Axis has released a fun football game for PC gamers. This years game is a marked improvement over last years offering. The developers really seem like they want to make the best football game possible, and I'm excited about what the next version will look like. And if you don't like the non NFL teams in the base game, there are mods that give you lots of options. TL;DR? It's far from perfect, but it beats a modded Madden 08. Mods in development, game constantly improving. If you want a american football game on the PC, I suggest supporting these developers and their effort.. Was able to put up 22 sacks and a 50-0 score in a 5 minute quarter game against a 'Hall of fame' difficulty CPU. CPU Cs just wander into no man's land after the snap. If you player control a blitzing MLB you can just run around him and sacks come thick and fast to shut down their offense. When with the ball, scoring is not much harder, running it becomes a simple case of getting it into the secondary. DL and LBs are quick but DBs stand there gaumless for a few seconds as you get the 1st down and more a lot of the time. Shame really, I like the game otherwise and was looking for a decent alternate Madden. Hopefully this series can be one in the future.. First I'm thankful for a football game on Pc and it's modestly fun. But the truth is that the Dreamcast, GC, Ps2, and Original XBOX will all provide you with better football gaming experience. I was wondering if this game was as good as NFL2K or maybe even NFL2K2, but honestly it's not. Sorry for this review but I have to be honest u2639.. Really really wanted to like the game and in a way, it is good.as it is the only Football (American) game for PC. But the game is just barebones, the franchise mode is just in name. No actual franchise mode at all. The gameplay seems to be missing penalties? Which again just proves that it is barebones.unfortunately.. What a waste of money, time and effort. Tons of bugs.too many to explain or believe. Examples: Score on the last play of a half, you donu2019t get an extra point try u2026 the other team kicks off to you from your 25. Crashes randomly. Editor is weak and does not allow for changing team names, locations or player names. Adding more "value" to your players is reflected in their profile but not in their game play . so you can spend time changing player values but the values you enter are not going to impact game play in any way. Game success, (winning) has nothing to do with keyboard skills nor play calling knowledge. The algorithms are set to increase difficulty against you, the longer you play which is not how actual football works, obviously. A converted Flash game that should have remained just that, a Flash game on Newgrounds played for free. If you just love digital voices and commentary that is absolutely out of alignment with whatu2019s happening in the game, this one could be for you.. No, it's not Madden. Now that that is out of the way. It's a small developer making football for PC users, so I support them and will continue to. If you want a replacement for Madden. This isn't it. Not yet anyways. But what it is, is a moddable football game full of funny tackling animations (not intentionally) and frustrating gameplay if you are expecting great realism. I enjoy the game for the most part and hope they continue to improve year after year. I like that it isn't NFL football, truthfully. That's it a ficticious league setup the way I think the NFL should be. without divisions. Simply a list of teams in order of best records to worst records. Only the best teams make the playoffs. It makes sense. The games won't be very realistic but still fun for what it is. The play clock stops after 7 seconds for some reason. There's not many plays to choose from. Some players seem impossible to tackle at times. And plenty more faults. Overall, I will buy the next one because I know they are making it better and I want to help these guys make a great game in the future. It's not like it costs \$60, after all. Who knows, maybe a couple years from now this game will be fantastic? But it won't have a chance if people don't support it. Or just keep getting ripped off by EA Sports and buy the dumpster fire, roster update, rehash of features that were removed and then put back in as 'new' features called Madden and forget they (along with the NFL) screwed all of us fans over, many years ago by taking away all the other games we used to be able to buy. Choice is yours.. I just bought this game lasat night. Now, I have read

some real unfair reviews of your product. For some reason they expect Madden on the PC. EA may have the budget, but Axis has the heart! This game rocks! Just finished a game wherein the PC and myself had a scoring frenzie, and it was a BLAST!!! If you are purchasing this game expecting a polished product with millions of dollars poured into it's development, then go get a console and get Madden. However, if you like football on the PC, and love the creative hearts of small software companys on a limited budget; still publishing quality games, look no further than Axis 2017. I have 2015, 2016, and now 2017; I love them all!!! Each season keeps getting just a little better.. Well, what do I say about this game? It's a shame that some people negatively view this game and compare it to Madden. First of all, you can't expect actual NFL teams due to licensing issues. Second, of course this game is not going to be as beautiful as Madden or deep with depth. It's a small team with a noticeably smaller budget than EA (By a few million.). With that being said there are things that I do enjoy about this game. 1. The physics in the game are interesting to say the least. I enjoy the tackling and the different ways thay players are tackeld or fall over. (P.S. Scrambling as a quarterback and launching yourself into a defender is hilarious). 2. The passing game (With the aiming rather than just pressing on an icon) is great. I love being able to decide where the football will go rather than just tapping a button. 3. The defender chasing is better than Madden (Yes, I said it). The defenders will actually run towards the area where the ball holder is running rather than making boneheaded mistakes such as running straight into an offensive lineman who can throw them to the ground or running in fifty different directions before finally running after the ball carrier. Those are three of the biggest positives that I take from this game. Now, there is obvious work to be done, but the dev team is responsive and looking to build up from this game. I knew what to expect (Unlike some negatative reviewers) and I took a chance on this game because I miss playing simulation football. I hope that Axis Football only continues to trend upward from here and I am already looking forward to Axis Football 2018 without having even finished my first season in this game. Understand what you're paying for and why you're paying for it before you go and write a review about how you expected this game to be like Madden.. What a waste of money, time and effort. Tons of bugs.too many to explain or believe. Examples: Score on the last play of a half, you donu2019t get an extra point try u2026 the other team kicks off to you from your 25. Crashes randomly. Editor is weak and does not allow for changing team names, locations or player names. Adding more "value" to your players is reflected in their profile but not in their game play . so you can spend time changing player values but the values you enter are not going to impact game play in any way. Game success, (winning) has nothing to do with keyboard skills nor play calling knowledge. The algorithms are set to increase difficulty against you, the longer you play which is not how actual football works, obviously. A converted Flash game that should have remained just that, a Flash game on Newgrounds played for free. If you just love digital voices and commentary that is absolutely out of alignment with whatu2019s happening in the game, this one could be for you.
